Biogeochemistry **22**: 219–220, 1993

Contents Volume 22 1993

Volume 22 No. 1

HANS-ROLF SCHULTEN & PETER LEINWEBER: Influence of the mineral matrix on the formation and molecular composition of soil organic matter in a long-term, agricultural experiment 1

H. M. RASK & J. J. SCHOENAU: ^{13}C natural abundance variations in carbonates and organic carbon from boreal forest wetlands 23

C. J. ALLAN, N. T. ROULET & A. R. HILL: The biogeochemistry of pristine, headwater Precambrian shield watersheds: an analysis of material transport within a heterogeneous landscape 37

Volume 22 No. 2

ERIC E. RODEN & JON H. TUTTLE: Inorganic sulfur turnover in oligohaline estuarine sediments 81

ERIC A. DAVIDSON & PAUL A. LEFEBVRE: Estimating regional carbon stocks and spatially covarying edaphic factors using soil maps at three scales 107

C.B. CRAFT & C.J. RICHARDSON: Peat accretion and phosphorus accumulation along a eutrophication gradient in the northern Everglades 133

Volume 22 No. 3

STEVEN W. SEAGLE & S. J. McNAUGHTON: Simulated effects of precipitation and nitrogen on Serengeti grassland productivity 157

WILLIAM F. J. PARSONS, MARTIN E. MITRE, MICHAEL KELLER & WILLIAM A. REINERS: Nitrate limitation of N_2O production and denitrification from tropical pasture and rain forest soils 179

JOHN R. ERTEL, JENNIFER M. CAINE & E. MICHAEL THURMAN: Biomarker compounds as source indicators for dissolved fulvic acids in a bog 195
